Honors

Welcome to the Honors Program

Program Philosophy

The Lee College Honors Program serves intellectually curious, academically talented, and highly motivated students who seek a deeper and more engaged learning experience. Rooted in the college's mission to provide quality instruction and prepare students for success in higher education and beyond, the program cultivates academic excellence, critical inquiry, and meaningful connection among students and faculty.

Founded in 1974 with the interdisciplinary American Studies course, Honors at Lee College has always been a collaborative, faculty- and student-driven initiative. Today, the program continues that tradition by offering students the opportunity to explore subjects in greater depth through dedicated courses and honors contracts that emphasize primary texts, discussion, and experiential projects.

Participation in the program has many benefits, including scholarships, chances to participate in cultural and academic events and field trips, and opportunities to engage in community service. Participation also allows Honors students an opportunity to distinguish themselves academically in preparation for transfer and employment. Through these ventures, we help students develop the confidence and curiosity that define lifelong learners and leaders.
