Job fair Aug. 4 to find part-time instructors in multiple disciplines

BAYTOWN, TX — Lee College is looking for part-time instructors in dozens of disciplines to add to its pool of talented faculty and continue the legacy of high-quality teaching and learning.

Interested parties are invited to discuss the available part-time teaching opportunities at the Adjunct Job Fair, to be held from 5-7 p.m., Thursday, Aug. 4, in the Phyllis Davis Room at 909 Decker Drive. Job fair participants are encouraged to bring their resumes to the event to share with current faculty, who will be available to answer questions and share insights from their own experiences in the classroom. Light refreshments will also be served.

Adjunct instructors are needed to teach day, evening and/or weekend classes in a wide range of fields across the Academic Division, Applied Sciences Division and Center for Workforce and Community Education — from Government, Psychology and Art Appreciation to Pipefitting, Millwright and Electrical.

Those who want to teach academic courses like English, History and Mathematics must have a master's degree and 18 graduate hours in the discipline being taught. Instructors for technical courses like Process Technology, Instrumentation and Welding typically require an associate degree and three years of related work experience in the teaching discipline.

Part-time faculty may teach traditional face-to-face classes, online classes or in a hybrid format at multiple locations: the main campus and McNair Center in Baytown; the newly opened Lee College Education Center – South Liberty County; the prison education program in Huntsville; and in dual-credit classes offered at several local high schools.

For more information about the upcoming Adjunct Job Fair or available positions, contact the Office of Human Resources at 281.425.6875 or hr@lee.edu.
